SUMMARY

BE Computer Science Engineering student (2022–2026) with a strong foundation in Java, Object-Oriented Programming (OOP), and Full Stack Web Development. Experienced in building MERN stack applications with REST APIs, authentication, and database integration. Proficient in HTML, CSS, JavaScript, React, Node.js, and MongoDB. Passionate about software development and problem solving, seeking an entry-level Software Engineer role to apply technical skills in real-world projects.

TECHNICAL SKILLS

Programming: Java, C (Core), JavaScript
Frontend: HTML5, CSS3, React.js, Tailwind CSS, Bootstrap
Backend: Node.js, Express.js, REST APIs, JWT Authentication
Database: MongoDB (CRUD Operations, Schema Design), MySQL
Tools: Git, GitHub, VS Code, Vite, Postman
Core Concepts: Object-Oriented Programming (OOP), Data Structures (Basics), SDLC, API Integration, Responsive UI, Problem Solving
Web Concepts: DOM Manipulation, Event Handling, Asynchronous Programming (Promises, Async/Await)
Version Control: Git Branching, Commit Management, Pull Requests

INTERNSHIP EXPERIENCE

Imagecon Academy – Mern-Stack Intern | June 2025 – January 2026

- Developed and maintained full-stack web applications using the MERN stack (MongoDB, Express.js, React, Node.js).
- Built responsive user interfaces and integrated REST APIs for smooth frontend-backend communication.
- Implemented authentication, CRUD operations, and database integration for dynamic web applications.
- Collaborated using GitHub workflows, task tracking, and clean coding practices in a team environment.

PROJECTS

Compensation Intelligence System (Full Stack)

- Developed a full-stack compensation analytics platform enabling structured salary submission, comparison, and market trend analysis across companies and job levels.
- Designed and implemented compensation calculation logic for total compensation analysis including base salary, bonus, and stock components.
- Built secure REST APIs with validation, data normalization, filtering, and company-wise analytics for scalable salary intelligence processing.
- Developed interactive dashboards and comparison modules to analyze compensation trends, level distributions, and company insights.
- Implemented authentication, role-based access control, and database integration for secure and efficient data management.
- Tech Stack: React, Tailwind CSS, Node.js, Express.js, PostgreSQL, Prisma ORM, JWT, REST API.

UH SkillBridge – Peer Mentorship Platform (MERN)

- Developed a scalable full-stack mentorship platform enabling mentor/mentee onboarding, profile management, mentor discovery, and session scheduling.
- Engineered a Mentor Matching System using weighted scoring algorithms based on skills, domain expertise, career goals, and preferred language.
- Built and secured RESTful APIs with JWT authentication and role-based authorization for mentors, mentees, and admin operations.
- Implemented session lifecycle management features including booking, status tracking, mentor notes, and feedback storage using MongoDB.
- Integrated a dynamic rating and review system that updates mentor performance metrics through running-average calculations after each session.
- Designed and developed admin dashboard functionalities for user monitoring, account moderation, and misuse prevention.
- Tech Stack: React, Tailwind CSS, Node.js, Express.js, MongoDB, JWT, REST API.

VP-Ecommerce Platform (React)

- Developed a responsive Single Page Application (SPA) for an E-commerce platform to manage product listings, cart operations, and order processing workflows.
- Implemented dynamic product filtering and category-based search functionality to enhance product discovery and user experience.
- Built reusable and modular React components for product display, shopping cart, and checkout management.
- Integrated real-time cart state management for seamless quantity updates, pricing calculations, and order summaries.
- Optimized frontend performance and ensured responsive design compatibility across desktop and mobile devices.
- Tech Stack: React, JavaScript, HTML, CSS.

EDUCATION

AVS Engineering College, Salem | BE Computer Science and Engineering | 2022–2026 | CGPA: 8.2
Government Higher Secondary School | HSC | 2020–2022 | Percentage: 70%

ACHIEVEMENTS & CERTIFICATIONS

1st Prize – National Level Symposium (2025) | National Level Hackathon (Participation)
Google Developers Badges (HTML, CSS, JavaScript)
Google Student Ambassador – Conducted Gemini AI awareness session for 50+ students
Certificate: Java Programming and Introduction to AI Concept
